About Me:

Senior game developer with 6+ years of professional experience in programming, technical art, and game design.

I have a passion for game development and all its facets, I'm proficient in C++, C#, Blueprints, and shader development. Always happy to learn new technologies and collaborate with others.

Professional History:

Nicktoons & The Dice of Destiny

Senior Unreal/C++ Developer

Petit Fabrik and GameMill Entertainment

November 2024 - September 2025

- **Skills:** C++, Unreal Engine 5, GAS, Jira, Blueprints, Git, Porting, Shaders and VFX.
- Released for all major gaming platforms at the time. (PC, Switch 1 and 2, PS5, Xbox Series X/S)
- Helped on the leading and the management of the development team.
- Implemented playable characters such as Katara, Jimmy Neutron, Danny Phantom and Timmy Turner.
 - Created their skills and moveset using GAS and C++
- Developed downloadable content system for skins and a major undisclosed alternate game mode.
- Optimized and ported the game into Nintendo Switch 1 and 2 and other consoles.

Pakinpaks

Lead Unreal/C++ Developer and Tech Artist

Indiebuild Team and Catoptric Games

December 2024 - Q1 2026

- **Skills:** C++, Blueprints, UE5, Autodesk Maya
- Responsible for the entire development of this project, with highlights being customization systems, procedural puzzles and cinematic systems.
- Responsible for all technical art and optimization of the game, including support for low-end modes using mobile rendering techniques.
- Created all visual effects and materials for the game.

Miraculous - Paris Under Siege

Lead Unreal/C++ Developer

Petit Fabrik and GameMill Entertainment

October 2023 - October 2024

- **Skills:** C++, Unreal Engine 4, Jira, Blueprints, Git, Porting, Shaders and VFX.
- Released for all major gaming platforms at the time. (PC, Switch, PS5, PS4, Xbox One, Xbox Series X/S)
- Responsible for leading and managing the development team.
- Developed both playable characters alongside with all their traversing and combat mechanics
- Optimized and ported the game into Nintendo Switch and other consoles.

DreamWorks Trolls Remix Rescue

Senior Unreal/C++ Developer and Level Designer

Petit Fabrik and GameMill Entertainment

July 2022 - October 2023

- **Skills:** C++, Unreal Engine 4, Blueprints, Git, Porting, Shaders and VFX.
- Released for all major gaming platforms at the time. (PC, Switch, PS5, PS4, Xbox One, Xbox Series X/S)
- Developed the character customization tool, player mechanics (climbing, swinging and other traverse mechanics)
- Developed several enemies (Violint, Boombeast, Anglerbuses)
- Made AI for roaming villagers and several other systems.
- Designed several levels for the game.
- Optimized and ported the game into Nintendo Switch and other consoles.

Gamble Tower

Lead Unity/C# Developer

Indiebuild

March 2021 - September 2023

- **Skills:** C#, Unity, Autodesk Maya, Substance Painter, FL Studio, Audacity

- Responsible for the entire programming of this project, with highlights being procedurally generated characters, floors, challenges, combats.
- As the lead game designer, making the game well-rounded and balanced was one of my responsibilities as well.

Nickelodeon Kart Racers 3

Mid Tech-Artist and VFX Artist

Petit Fabrik, Bamtang Games and GameMill Entertainment
June 2022 - October 2022

- **Skills:** Unreal Engine 4, Blueprints, Sequences, Git, Shaders and VFX.
- Worked on multiple visual effects and shaders for the game.
- Focused on the development of VFX for trailers and cinematic movies.

Kukoos: Lost Pets

Mid Unreal/C++ Developer and Tech-Artist

Petit Fabrik and Modus Games
August 2020 - December 2022

- **Skills:** C++, Unreal Engine 4, Blueprints, Autodesk Maya, Git.
- Released for Xbox One, PS4, Nintendo Switch and Steam.

- Was responsible for developing the entire programming and mechanics of several key features such as Monktopus/Frog (the final boss) and Petri (one of the game's main pets).
- Also developed a plethora of particle systems and special effects for other bosses, characters and mechanics.
- Worked on the porting for all platforms, but specially for Nintendo Switch.

ADVULTRA

Lead Unity/C# Developer

Indiebuild

July 2019 - July 2020

- **Skills:** C#, Unity, Adobe Photoshop, FL Studio, Audacity, Git
- Developed the entire game from scratch and published it on Play Store.
- (no longer available, but there are videos on YouTube)

Game Development Teacher (SAGA)

School of Art, Game and Animation (SAGA)

August 2019 - August 2020

- **Skills:** Unreal Engine 4, Blueprints, ZBrush, Autodesk Maya, Adobe Photoshop, Substance Painter, Git.
- Taught the students several game development softwares such as Unreal Engine, Autodesk Maya, Substance Painter and Pixologic ZBrush.
- Responsible for managing students' projects until the end of the course, as well as helping with the delivery.

Skills:

Programming

- C++
- C#
- Python
- GDScript
- GML
- Unreal Blueprints
- Gameplay Ability System (GAS)

- Worked with devkits for PS5, Xbox Series, Switch 1 and Switch 2
- Developed Unreal and Unity tools and extensions for internal usage

Game Engines

- Unreal Engine
- Unity
- Godot
- Game Maker
- GMS

Source Control

- Git
- GitHub
- Perforce
- TurtleSVN

Related Software

- Autodesk Maya
- Blender
- Substance Painter
- Adobe Photoshop
- FL Studio
- Audacity
- ZBrush

Project Management Tools

- Jira
- Trello
- Notion
- Obsidian
- Clickup
- Slack

Languages

- English (Fluent)
- Brazilian Portuguese (Native Language)

Other Info

- Knowledgeable in Unreal Materials, Unity Shaders and VFX/Particle Creation.
